OBJECTIVE

Motivated second-year B.Tech student specializing in AI & Machine Learning, seeking internships and research opportunities to apply hands-on experience in Python, LLM integration, and RAG pipelines toward solving real-world problems.

EDUCATION

GIET University

Bachelor of Technology in Computer Science (AI & Machine Learning)

Gunupur, Odisha

July 2024 – March 2028

- Expected Graduation: March 2028
- Relevant Coursework: Data Structures, Algorithms, Machine Learning, Deep Learning, Python Programming, Statistics

TECHNICAL SKILLS

Programming Languages: Python

Machine Learning & AI: Regression, Classification, Neural Networks, Feature Engineering, Model Evaluation, RAG Pipelines, Agentic Workflows, LLM Integration (Ollama, Gemini API)

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow, Flask

UI/UX & Design: Figma, GSAP, UI/UX Design, Prototyping

Tools & Technologies: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Command Line Interface

Soft Skills: Quick Learner, Analytical Thinking, Team Collaboration, Technical Documentation, Creative Problem Solving

PROJECTS

AI Resume Analyser & Curriculum Planner | *Team Project | Python, Ollama, Gemini API, RAG*

- Built an AI tool that scans an uploaded resume, analyses skills, and benchmarks them against current market demand.
- Used Ollama-powered LLMs for intelligent resume parsing, skill extraction, and market comparison workflows.
- Integrated Gemini API to generate a personalized learning roadmap tailored to the candidate's skill gaps and career goals.
- Designed an agentic pipeline chaining resume analysis, market comparison, and roadmap generation into a seamless end-to-end flow.

AI Medical Report Analyser | *Team Project | Python, Ollama, RAG Pipeline*

- Developed an AI-powered medical report analyser using a RAG pipeline to process and interpret medical documents.
- System ingests reports, retrieves relevant clinical knowledge, and generates simplified summaries with personalized health suggestions.
- Used Ollama for local LLM inference to ensure privacy-safe, on-device analysis of sensitive medical data.
- Translates complex medical jargon into clear, patient-friendly language with actionable recommendations.

Student Performance Predictor | *Python, Scikit-learn, Flask*

2024

- Built a machine learning web app using Scikit-learn to predict student performance based on academic and demographic features.
- Trained and compared multiple classification models (Logistic Regression, Random Forest) to select the best-performing one.
- Deployed the model as a REST API using Flask, enabling real-time predictions via a simple web interface.

EXPERIENCE & ACTIVITIES

Machine Learning Study Group Participant2024 – Present

GIET University

- Actively participating in collaborative learning sessions focused on machine learning concepts and applications.
- Working on hands-on projects involving regression, classification, and clustering algorithms.
- Sharing knowledge and insights with peers to foster a collaborative and productive learning environment.

CERTIFICATIONS & TRAINING

Learnathon 4.0: Competed in a one-day ML hackathon; built and deployed a machine learning model under time constraints to solve a given problem statement.

Self-Paced Learning: Python Programming, Machine Learning Fundamentals, Data Structures & Algorithms.

Online Courses: Machine Learning Specialization, Deep Learning Foundations.

ADDITIONAL INFORMATION

Interests: Machine Learning, Artificial Intelligence, Agentic AI, UI/UX Design, Data Science, Open Source Contribution, Competitive Programming

Languages: English (Fluent), Hindi (Native), Odia (Native)

Creative Skills: UI/UX Design, Digital Sketching, Technical Writing, Data Visualization

Availability: Open to internships, research opportunities, and collaborative projects in AI/ML and Software Development
